

DYNAMIC THREAT DEFENSE

Güçlü bulut tabanlı sandboxing ile **sıfır gün tehditlerinden korunun**

ESET Dynamic Threat Defense'in teknik özellikleri

OTOMATİK KORUMA

Kurulum ve ayarlar yapıldıktan sonra yönetici veya kullanıcının bir işlem yapması gerekmez. Uç nokta veya sunucu üzerindeki ürün, örnek dosyanın iyi, kötü veya bilinmeyen olduğunu otomatik olarak tespit eder. Eğer örnek bilinmiyorsa, analiz edilmesi için ESET Dynamic Threat Defense'e gönderilir. Analiz bittiğinde sonuç paylaşılır ve uç nokta ürünleri buna göre tepki verir.

MAIL SECURITY KORUMASI

ESET Dynamic Threat Defense sadece dosyalarla değil, direkt olarak ESET Mail Security'yle de çalışarak, zararlı e-postaların firmanızın ulaşmasını engeller. İş sürekliliğini sağlamak için, sadece firma dışından gelen e-postalar incelenmek üzere ESET Dynamic Threat Defense'e gönderilir.

ESET Dynamic Threat Defense, kullandığı bulut tabanlı sandboxing teknolojisiyle, Mail Security ve Endpoint ürünleri gibi ESET ürünlerine artı bir güvenlik katmanı sağlayarak yeni ve daha önce görülmemiş tehdit türlerini algılar. Bu sandbox, kodun tam statik analizi, makine öğrenimiyle örneğin derinlemesine incelenmesi, bellek içi inceleme ve davranış bazlı tespit gibi bir çok türden algılamaya yetmişi için.

MANUEL GÖNDERİM

Herhangi bir zamanda, bir kullanıcı veya yönetici, ESET uyumlu bir ürünle örnekleri analiz için gönderilebilir ve tam sonucu alabilir. Yöneticiler, kimin ne gönderdiğini ve ne sonuç alındığını direkt olarak ESET Security Management Center'dan görecektir.

İSTEĞE GÖRE ÖZELLEŞTİRME

ESET Dynamic Threat Defense için her bilgisayara özgü detaylı kurallar oluşturma olanakları vardır. Böylece yönetici, gönderimleri ve alınacak sonuca göre yapılacak işlemleri kontrol edebilir.

Tamamen şeffaf:
ESET LiveGrid'e
gönderilen her
dosyanın görüldüğünü

ESET farkı

ÇOK KATMANLI KORUMA

Bir dosya gönderildiğinde, ESET Dynamic Threat Defense üç farklı makine öğrenimi modeli kullanır. Bundan sonra, kaçınma karşıtı teknikleri atlatmaya çalışarak kullanıcı davranışını simüle eden tam sandbox ile örneği çalıştırır. Arkasından, derin öğrenimli sinir ağı ile görülen davranışı daha önceki davranış verileriyle karşılaştırır. Daha sonra, ESET'in son sürüm tarama motoru, olağan dışı herhangi bir duruma karşı her şeyi tek tek analiz eder.

HAREKETLİLİK

Son günlerde müşteriler, sık sık seyahat ediyorlar ve işlerinin başında olmuyorlar. Bu yüzden ESET Dynamic Threat Defense, kullanıcılar nerede olursa olsun dosyaları analiz edebilir. En iyi yanı ise, zararlı bir şey algılandığı anda tüm şirketin korunmasıdır.

TAM ŞEFFAFLIK

Analiz edilen her örnek, örneğin kendisi ve kaynağı hakkında çeşitli bilgilerle birlikte ESET Security Management Center konsolunda listelenir. Tüm bilgiler anlaşılması kolay bir formatta gösterilir. Sadece ESET Dynamic Threat Defense'e gönderilen örnekleri değil, ESET'in Bulut Zararlı Yazılım Koruma Sistemi – ESET LiveGrid®'e gönderilen her örneği de görüntüleriz.

BENZERSİZ ZİH

Her dakika önemlidir. Bu nedenle ESET Dynamic Threat Defense, örneklerin çoğunu beş dakikadan kısa sürede analiz edebilir. Eğer bir örnek daha önce analiz edilmişse, şirketinizdeki tüm cihazların korunması sadece birkaç saniye sürer.
